

Immunobiology of the Human MHC

Proceedings of the 13th International Histocompatibility Workshop and Conference

ISBN#: 0-945278-03-9

Order Price: \$285 (includes shipping)

Volume 1, approximately 1550 pages, includes Featured Reviews, Joint Reports from the IHWS Working Groups and a comprehensive update from the HLA Nomenclature Committee. The Featured Reviews are written by leaders in population genetics, immunobiology, genetic factors affecting human disease and the immunogenetics of transplantation. The Joint Reports summarize the data and findings of the 13th IHWS and the International Histocompatibility Working Groups (IHWS). Working Group Joint Reports address a wide scope of immunogenetics research including Anthropology and Human Diversity; HLA and Disease studies in type 1 diabetes, rheumatoid arthritis, narcolepsy and the spondylarthropathy syndromes; HLA in pregnancy; hematopoietic cell transplantation; role of alloantibody in renal graft rejection; minor histocompatibility antigens; HLA peptide ligands; cytokine gene polymorphisms; natural killer cell receptors;

HLA typing and informatics; statistical methods and analytical tools; HLA and cancer; serology and HLA phenotypes; genomic organization of the MHC: genes, SNPs and microsatellites; hemochromatosis and psoriasis; mycobacterial diseases; virtual DNA analysis and the International HLA Reference Panel Cell Lines comprehensively genotyped for HLA alleles.

Volume 2, approximately 700 pages, contains brief reports (3-4 pages each) of papers presented at the International Histocompatibility Congress.

Immunobiology of the Human MHC is published. Limited copies are available for purchase now!

Purchase price: \$285 per two-volume set (includes shipping)	Quantity ordered: ___ set(s)
